

# MY AUTO-BIOGRAPHY

I am an irreplaceable part of the upper elementary, my name is Curtis. I can never seem to get my mouth shut. My best school subject is math, I also enjoy spelling.

I have two sisters, one of them is 15 the other is 29. I have a dog and two parents. My family loves our dog Becky. Becky is a playful 2 year old (14 in dog years) dog who loves cheese. My fifteen year old sister got Becky for her 13<sup>th</sup> birthday.

My favorite subject is math because there's no end to numbers, so there's no end to the possibilities. I enjoy spelling because I love long words.

I also love to read. I've read many books but so far the "Percy Jackson and the Olympians" series is the best. I don't really notice it but most of the words I know I learn from reading books.

At school I have a lot of friends. Four of my friends and I pile up every day in a group sort of thing. We love to talk. When a teacher comes in we stop talking and pretend to do work. Somehow I manage to get work done every day. In other words, I talk way too much. My favorite kind of talking is arguing (if you didn't already know that).
